

Aniruddha Kagalkar

Principal/Staff DevOps Engineer | AWS Infrastructure & Automation Expert

✉ aniruddha.kagalkar@gmail.com | 📞 +91-9881070204 | 🌐 [LinkedIn Profile](#)

Professional Summary

Seasoned DevOps and Infrastructure Engineer with **18+ years** of experience specializing in **AWS cloud infrastructure**, automation, and scalable system design. Proven expertise in **Python automation**, **Terraform**, **CI/CD pipelines**, and infrastructure optimization across enterprise-scale environments. Strong track record of designing cost-efficient cloud architectures, implementing infrastructure as code, and leading cross-functional engineering teams to deliver reliable, secure solutions.

Key Achievements Summary

- ✓ **18+ years DevOps/Infrastructure experience** across enterprise environments
- ✓ **AWS SME** with proven cost optimization (\$120K+ annual savings) and security implementation
- ✓ **Python automation expert** with framework development and process optimization
- ✓ **Terraform & Infrastructure as Code** experience across multiple cloud platforms
- ✓ **CI/CD pipeline optimization** with measurable performance improvements (25%+ build time reduction)
- ✓ **Technical leadership** experience managing 15-40 engineers across infrastructure initiatives

Professional Experience

Senior Software Engineer | Atlassian India LLP | Pune, India

April 2024 - Present

AWS Infrastructure & CI/CD Leadership:

- **Designed and implemented AWS cost monitoring system** with anomaly detection, achieving **\$120K annual savings** through automated cost optimization strategies
- **Optimized CI/CD pipelines** using Maven caching and parallel execution, reducing build times by **25%** and improving deployment efficiency
- **Led monorepo infrastructure transformation**, consolidating 25+ repositories with **35% build efficiency improvement** and reduced code duplication by 20%

Python Automation & Process Innovation:

- **Automated 70% of critical infrastructure testing** using Python-based Playwright framework, reducing manual effort by 50%
- **Developed LLM-powered automation tools** for test case migration, converting 250+ test cases with high accuracy and efficiency
- **Implemented automated regression testing framework** adopted across 4+ Atlassian products

Technical Leadership & Cross-Team Collaboration:

- **Led and mentored 15 engineers** with focus on DevOps best practices, infrastructure automation, and cloud optimization
- **Partnered with 6 engineering and product teams** to ensure seamless infrastructure integration and deployment strategies

Staff Software Engineer | VMware India Pvt Ltd | Pune, India

April 2017 – April 2024

AWS Subject Matter Expert & Cloud Architecture:

- **Acted as AWS SME** for multiple teams, providing expertise in networking, security, and infrastructure optimization
- **Designed cost-efficient AWS architectures**, reducing cloud expenses by **20%** through right-sizing, automated monitoring, and infrastructure optimizations
- **Implemented AWS security best practices** including IAM, RBAC, and VPC configurations, reducing security vulnerabilities by **40%**
- **Supported infrastructure troubleshooting** across teams, improving deployment reliability and system performance

Infrastructure as Code & Platform Development:

- **Architected and led common SaaS platform** serving as infrastructure backbone for customer onboarding, monitoring, and production operations
- **Built microservices architecture** on Kubernetes with infrastructure as code principles, enabling rapid scalable deployment
- **Led team of 20 core engineers** and provided technical guidance to 40+ engineers across multiple infrastructure initiatives

DevOps Pipeline & Automation Strategy:

- **Designed company-wide automation strategy** covering CI pipeline optimization, automated testing, and real-time monitoring
- **Implemented comprehensive DevOps pipeline** with static analysis, security checks, automated testing (unit to E2E), and release validations
- **Introduced cutting-edge technologies:** Apache Airflow for workflow automation, Kubernetes Operators, and Golang adoption across teams

Cross-Functional Infrastructure Leadership:

- **Collaborated with 5+ product teams** to standardize APIs, data pipelines, and observability frameworks for seamless infrastructure integration
- **Provided strategic technical advisory** to director-level leadership on architectural decisions, performance metrics, and infrastructure roadmap

Principal Software Engineer | Symantec India Pvt Ltd. | Pune, India

July 2015 – April 2017

- **Led 6+ engineer team** developing Java-based security management platform with focus on infrastructure automation
- **Built comprehensive automation framework** increasing code coverage by 14% and improving deployment reliability

Module Lead | Avaya India Pvt Ltd | Pune, India

April 2012 – July 2015

- **Led cloud-based communication infrastructure** development, improving enterprise connectivity and system resilience
- **Designed and implemented VoIP solutions** with focus on high-availability architectures and real-time performance
- **Developed automation frameworks** for deployment, monitoring, and security processes optimization

Senior Consultant | Capgemini India Pvt Ltd. | Mumbai, India

January 2011 – April 2012

- **Led enterprise system integration projects** ensuring seamless application communication and infrastructure reliability

Senior Software Engineer | Avaya India Pvt Ltd | Pune, India

March 2006 – December 2010

Senior Software Engineer [March 2007 – December 2010]

- **Owned Java-based application development** with focus on high-availability architectures and system performance optimization
- **Designed internal process automation** improving team efficiency and system reliability

Intern/Contractor [March 2006 – March 2007]

- **Developed L3/L4 search engine** leveraging infrastructure data, improving customer response time by 80%

Core Technical Skills

Cloud & Infrastructure: AWS (SME), Kubernetes, Docker, Infrastructure as Code, VPC, IAM, RBAC

Automation & DevOps: Python, Terraform, CI/CD Pipelines, GitHub/GitLab, Jenkins, Build Optimization

Programming: Python, Golang, Java, JavaScript, TypeScript

Monitoring & Observability: AWS CloudWatch, Prometheus, Grafana, Performance Monitoring

Security: AWS Security Best Practices, IAM, RBAC, Security Vulnerability Management

Education

Master of Science (Computer Applications)

Symbiosis Institute of Computer Studies and Research (2004 – 2006)

Bachelor of Computer Science

Willingdon College of Arts and Sciences, Sangli (2001 – 2004)

Awards and Recognition

- **5 Kudos Awards (Atlassian)** – Technical leadership, infrastructure innovation, and cross-team collaboration
 - **2x Accelerate Our Best Award (VMware)** – Driving efficiency in cloud-native infrastructure applications
 - **Club Stellar Award (Avaya)** – Outstanding contributions to infrastructure and software engineering
-

Address: B-804, Vista Luxuria, Pune Solapur Road, Manjri Bk, Pune 412307, Maharashtra, India
