## PROFESSIONAL SUMMARY

Principal/Staff SDET with over 18 years of expertise in building and scaling automation strategies, quality engineering frameworks, and CI/CD pipelines across web, cloud-native, and streaming ecosystems. Proven track record in designing robust test architectures in Java, Python, Go and leading enterprise-grade automation initiatives across web, mobile, API, and data platforms. Strong experience in ETL engineering, DevOps automation, and backend development with demonstrated leadership in team mentoring, cross-functional collaboration, and stakeholder communication.

## KEY ACHIEVEMENTS

- Upskilled manual testing team to automation, reducing manual effort by 60% and shortening time to market by 2 weeks within 3-month release cycle
- Led team of 20 engineers through structured mentorship and continuous guidance
- Designed end-to-end automation strategy for 250-developer organization covering framework development, CI/CD, infrastructure automation, and monitoring
- Achieved 80% automation coverage for enterprise distributed systems running on cloud
- Reduced CI/CD build times by 25% and cut cloud costs by \$350K/year via pipeline optimization and AWS monitoring
- Migrated 250+ Cypress test cases to Mocha and TypeScript using LLM, improving speed and maintainability
- Delivered high-impact observability stack using Prometheus and custom Golang-based Telegraf plugin

# PROFESSIONAL EXPERIENCE

## Senior Software Engineer | Atlassian India LLP, Pune | April 2024 – Present

- Built and deployed Playwright-based test automation framework used by 150+ engineers across 4+ products
- Reduced manual QA effort by 50% through 70% automation coverage of regression and integration suites
- Migrated 250+ Cypress tests to Mocha/TypeScript using LLMs, enhancing maintainability and execution speed
- Consolidated 25+ Jira plugin repos into monorepo, reducing duplication by 20% and improving build times by 35%
- Mentored 15+ engineers and led 100+ code/design reviews
- Influenced roadmap for regression automation
- Automated test metrics reporting and integrated regression dashboards with CI/CD pipelines

## Staff Software Engineer | VMware India Pvt Ltd, Pune | April 2017 – April 2024

- Spearheaded DevOps initiatives and automation of infrastructure provisioning using Terraform, Helm, and GitOps workflows
- Designed and implemented scalable backend components, REST APIs, and data processing modules
- Led 20-member QA team with 40+ engineers overall, delivering test automation for vRealize Suite
- Designed CI-integrated test frameworks using Selenium, REST Assured, Appium, pytest
- Developed Kubernetes-native testing tools and integrated observability using Prometheus/Grafana
- Automated Web/API/CLI/UI tests using Golang, Python, Node.js
- Enabled ETL pipeline testing using Kafka, Py-Faust, Airflow
- Reduced test execution time across CI/CD by 25% through parallelization and smart test data partitioning
- Developed complete Kubernetes manifests for end-to-end infrastructure and templated them using Helm
- Successfully deployed and managed workloads on Tanzu and EKS with full observability enabled via Prometheus and Grafana

## **Principal Software Engineer | Symantec, Pune | July 2015 – April 2017**

- Led QA automation for security management platform and increased code coverage by 14%
- Acted as Scrum Master for automation teams ensuring sprint predictability and velocity

## **Module Lead | Avaya, Pune | April 2012 – July 2015**

- Automated VoIP/contact center flows with Selenium and AutoIT
- Improved test cycle efficiency

## **Senior Consultant | Capgemini, Mumbai | January 2011 – April 2012**

- Led system integration and E2E test automation across enterprise communication platforms

## **Senior Software Engineer | Avaya, Pune | March 2006 – December 2010**

- Delivered internal productivity tools
- Developed L3/L4 issue triage engine improving support time by 80%

## **TECHNICAL SKILLS**

**Programming Languages:** Python, Java, JavaScript, TypeScript, Golang, C#

**Test Automation Frameworks:** Selenium, Playwright, Cypress, Appium, REST Assured, TestNG, PyTest, Mocha, Cucumber, Robot Framework

**API Testing:** Postman, SoapUI, Swagger, REST Assured

**Mobile Testing:** Appium, Android/iOS Automation

**CI/CD:** Jenkins, GitLab CI

**Cloud and Infrastructure:** AWS (S3, EC2, EKS, IAM), Docker, Kubernetes, Helm, Terraform, GitOps

**Performance Testing:** JMeter, Gatling, LoadRunner

**Monitoring and Observability:** Prometheus, Grafana, Telegraf, AWS CloudWatch

**Version Control:** Git, GitHub, Bitbucket, SVN

**Database and Messaging:** SQL, NoSQL, MongoDB, Kafka, Airflow, ETL pipelines

## Education

### **Master of Science (Computer Applications)**

Symbiosis Institute of Computer Studies and Research (2004 – 2006)

### **Bachelor of Computer Science**

Willingdon College of Arts and Sciences, Sangli (2001 – 2004)

## Awards and Recognition

- **5 Kudos Awards (Atlassian)** – Technical leadership, infrastructure innovation, and cross-team collaboration
- **2x Accelerate Our Best Award (VMware)** – Driving efficiency in cloud-native infrastructure applications
- **Club Stellar Award (Avaya)** – Outstanding contributions to infrastructure and software engineering
